

## Post-Processor Development Request Form (CNC lathe centers)

Given the variety of the available CNC machines and controllers, this form aims to help you define the basic parameters of your CNC machine tool. The more fields of this form you fill, the better we are to understand your situation and thus the quicker we are to respond to you regarding your request. Please be sure to fill in only information about the specific model of your machine.

Helpful will be information such as full "G" and "M" code lists and canned cycles applicable to your machine. Also, tested G-code should be provided to further help the post-processor development procedure. Sample G-code may include start of file, coolant on/off, tool changes, cutter compensation, arcs, canned cycles and any special controller specific code used. Finally it would be useful to provide us with the manual of the machine controller.

\* This form can be sent: 1. via e-mail to – info@Post-Processors.com , 2. via Fax στο – 2130 360 638 , 3. Via mail – 54, Maikina Str, P.O.: 15772, Zografou, Attiki, Greece

## CNC Machine Tool Drawing

\* Please provide a drawing describing the CNC machine tool and its axes.

### Additional Information

\*Please provide us with any additional information is believed that will be helpful for the development of the Post-Processor (i.e. tested G-code, applicable fixed cycles, special functions etc)
